DOWN

- 1 Envelope abbr.
- 2 Radar input?

THE INDEPENDENT SUDOKU

PUZZLE BY OPENSky

Sudoku is a Japanese logic puzzle that consists of a 9-by-9 grid with some of the 81 squares filled in with numbers. Your challenge is to fill in the rest. There's only one simple, but often maddening, rule: The numbers 1 through 9 must appear only once in each of the grid's nine rows, nine columns, and nine 3-by-3 blocks. Proper sudokus have only one solution, meaning they can always be solved by logic. Don't place a number unless you have determined it is the only number that can go in that square. Trial and error guessing is hard work unless there are only a few squares remaining to solve.

THE INDEPENDENT KAKURO

© 2005 KrazyDad.com

Kakuro puzzles are like a cross between a crossword and a Sudoku puzzle. Instead of letters, each block contains the digits 1 through 9. The same digit will never repeat within a word. If you add the digits in a word, the sum will be the number shown in the clue. Clues are shown on the left and right sides of "across" words, and on the top and bottom sides of "down" words
